

Product Realization & Contract Manufacturing

Supplying Quality and Value for Customers since 1995

Design Services

Electronic Design
Mechanical Design
Industrial Design
Regulatory Compliance Test Design

Proven ability to design or **re**-design for specific goals, including:

- Design for Manufacturability (DfM)
- Design for Cost reductions (DfC)
- Design for Environmental (DfE)
- Design for eXcellence (DfX) : Safety, Test, Reliability, Quality

Contract Manufacturing

Flexible manufacturing services

- Turnkey manufacturing or consigned kits
- Retail Ready services, including documentation and packaging
- Extensive quality checks and final testing of each product

PCBA: State of the art Printed Circuit Board Assembly facility

- Automated SMT, thru-hole, BGA's
- Automated optical inspection, component verification, fully RoHS capable

Electromechanical Fabrication ("Box Build"), and System Integration services

- Large capacity production lines designed for fast re-configuration
- Electronic assembly instructions with step-by-step visual procedures delivered on-line to the technicians
- Complete integration of complex systems

Warranty & Repair Services

- Product repair, upgrades and refurbishing
- Track unit history, stock replacement parts and consumables
- Direct receipt and shipping

About Us

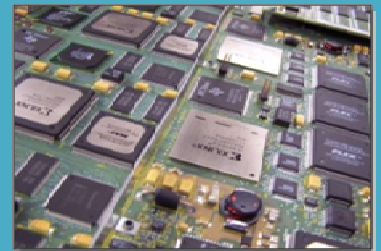

- ISO 9001:2000
- 43,000 square feet of product realization capacity
- SBA Small Business, Woman Owned Business

Tight coupling of design, manufacturing, and service teams means *seamless project transitions...*

Fast and seamless transitions *speed project velocity ...*

Higher velocity means *lower cost, faster turnaround time, earlier to market*
